

## **ALPHA NETWORKS IS CURRENTLY LOOKING FOR A HTML5 DEVELOPER**

### **WHO WE ARE AND WHAT WE ARE LOOKING FOR?**

Founded in 2008, ALPHA NETWORKS has become one of the fastest growing software companies, providing Pay TV solutions. ALPHA NETWORKS empowers the innovation, accelerates the projects go-to-market, and enhances the next generation TV- entertainment business. Serving customers all over the world, our product development team and engineers continue to develop new technologies that will engage, connect and transform the way people watch TV.

Headquartered in Belgium, with sales representatives in Europe, Asia, and South America, the company is internationally recognized. Working with major Telecom and Media companies such as Orange, Ecomet, Telecentro, ALPHA NETWORKS excels in carrier grade deployments and customer support.

### **Job description**

Alpha Networks is looking for a HTML5 Developer to join the Product & Marketing Team.

He/she is motivated to combine the art of design with the art of programming to develop VOD and TV applications. Applications created will be fully oriented to demonstrate new features and/or innovative use cases, which will be shown during international fairs and customer meetings. These applications will be also used by the Testing Team to evaluate the capability of the back-end platform to answer customer's needs.

He/she will work in partnership with external UI/UX-designer and will be the bridge between graphical design and technical implementation, taking an active role on both sides, defining how the application looks like and how it works.

### **In this team, the HTML5 Developer will have the following key responsibilities:**

Create video oriented interfaces for demo, testing and innovation purpose on top of Alpha Networks product

- Develop new user-facing features
- Build-up the interface based on reusable code and libraries for further use
- Ensure the technical feasibility of UI/UX designs
- Collaborate with other team members and stakeholders (R&D Innovation Team)
- Ensure the end-user experience
- Help to improve the back-end APIs performance and design

### **EXPERIENCE, EDUCATION AND SKILLS**

- Graduate or Bachelor in computer science or equivalent by experience.
- Proficient understanding of web mark-up, including HTML5 and CSS3

- Good understanding of server-side CSS pe-processing platforms, such as LESS and SASS
- Strong knowledge of Web Standards and Web Services integration (REST/JSON)
- Familiar with differences in other HTML5 based view and capable to build HTML5 application on top on any device
- Knack of adhering to best design practices
- Fair understanding of JavaScript programming
- Proactive and multitasking oriented
- Able to work independently and be stress tolerant

## **LANGUAGES AND PROFILE**

- French: Spoken and written
- English: Spoken and written.

## **OFFER DETAILS**

Competitive salary depending on skills level and prior work experience.

Collective benefits: group insurance, hospital insurance (full DKV), Eco vouchers and meal vouchers.
